1. Claims 38-45 are allowable over the prior art of record.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicant's claimed apparatus as set forth in independent claim 38 that is particularly characterized at least by the claimed "first application part ..."; "second application part ..."; and "synchronous oscillator ..." taken together and taken in the overall context of independent claim 38.

Dependent claims 39-40 are allowable for at least the reasons for which claim 38 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicant's claimed apparatus as set forth in independent claim 41 that is particularly characterized at least by the claimed "quadrature hybrid ..." and "pair of synchronous oscillators each responsive to a respective one of the quadrature signals ..." taken together and taken in the overall context of independent claim 41.

Dependent claims 42-45 are allowable for at least the reasons for which claim 41 is allowable.

2. Claims 1-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

On line 1 of independent claim 1, the phrase "radio or radar device" is indefinite in that the disjunctive does not link equivalent elements.

On lines 1-3 of independent claim 1, it is unclear in context from the preamble phrase "having a power supply and a power control for controlling power provided ..." if the "power supply" and the "power control" are claimed as part of the claimed apparatus. In addition, if the "power supply" and the "power control" are being claimed in claim 1, then the transitional phrase "comprising" (line 3) should be changed to "further comprising."

Dependent claims 2-37 are unclear in that they depend from unclear independent claim 1.

3. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
4. Claims 2-37 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lindell ('748) is of interest in that it shows the use of division of a signal into quadrature, the use of a summing element (item 116 in Figure 4), and the use of a synchronous oscillator (item 120 in Figure 4).
